## Artisan Perfumery

Introducing House Germaine™, a handcrafted artisan fragrance brand of impeccable quality. House Germaine perfumery can be purchased retail through our e-commerce website and is now available wholesale direct from our workshop.

The inaugural collection features four original handcrafted perfumes with more in development. Each scent conveys the quality and pleasure of its creation. The synergy of natural botanicals with modern perfumery materials results in fine fragrances that perform with elegance and endurance.

Delight your customers with an American-made luxury product. House Germaine™ fragrances are human-crafted with skillful artistry for lives of more beauty.

## Process

Each House Germaine product is meticulously crafted in our workshop according to traditional methods.

The process begins with a drop-by-drop olfactory exploration of scent as artistic media: pure fragrance materials are layered and balanced to evoke a pleasurable memory of time and place. Multiple versions of a formula allow us to select only the finest interpretation.

Next, we wait one month before selecting the final scent for completion. From here, the work becomes mathematical: The drop-by-drop formula is translated gravimetrically for reproducibility and scaling. Each material is cross-referenced with industry safety standards and results in a gentle fragrance with clear and simple labeling.
